Projects

Multi-Agent Drone Rescue System	2025
<i>Artificial Intelligence Multi-Agent Systems Drone Technology</i>	
• Designed an AI-powered multi-agent system for disaster response and rescue operations. • Implemented autonomous drone navigation with grid-based path planning using A* algorithm. • Developed human detection and triage classification (H1, H2, H3) using sensor-based data such as temperature, movement, and visible injuries. • Simulated real-time scanning, prioritization, and coordinated rescue operations using JavaScript.	
KIET Insight	2024 – 2025
<i>Web Application Data Analytics</i>	
• Developed a data-driven web application to analyze and visualize institutional data. • Implemented structured data processing for generating meaningful insights. • Collaborated with team members to design and integrate core application modules.
